

MOTAN COLORTRONIC LIMITED PRESS RELEASE

New RT100 Control

Regloplas has recently introduced the innovative control system for its temperature control units.

The RT100 control is equipped with a user friendly 3.5" TFT colour display complete with an integrated RCD dial and push button for simple navigation.

Product advantages include:

- Precise temperature measurement and exact control of outlet, consumer and inlet temperatures
- Comprehensive standard functions
- Integrated contactless flow rate measurement (optional)
- Integrated USB interface for software updates and configuration
- Open, flexible interface design
- Modular design for optimal customisation
