

MOTAN COLORTRONIC LIMITED PRESS RELEASE

Regloplas New Features

Regloplas (thermoregulators), founded in Switzerland, celebrates its 40th year in 2011.

To celebrate this event, a new range with unique features has been released into the market.

The range now comprises of water based units for 90-140°C, 160°C and 180°C and oil units for 150-200°C and 300°C.

A full range comprising heating, cooling, interfaces and flow rate measurement, magnetic pumps and varied capacities, ensures a unit with optimum price/performance ratio.

RegloChill mobile chillers up to 120 kW and central cooling systems up to 100 kW allows a one stop solution for all customers.

A large stock of units allows prompt delivery for most customer requirements.
