
MOTAN COLORTRONIC LIMITED PRESS RELEASE

Think Materials Management

Since October 2010, Motan Colortronic Limited, based at Chesterfield, has grown from strength to strength.

The new, larger sales and service team (probably the largest in the industry) has enabled us to continue to enhance customer support.

The Technical and Support Centre, with a vast stock of standard units, provides our customers with off the shelf standard and customer specific solutions for all areas of plastics processing and recycling.

Unlike many competitors, Motan Colortronic is not purely a supplier; our units are designed, built, installed and serviced by the same company.

The high quality product line incorporates leading brands, ensuring reliable, energy efficient and cost effective solutions.

These brands include :

- Motan
- Colortronic
- Regloplas
- Herbold Meckesheim

All are established brands within the UK and Ireland, some for over 36 years and all with a proven record.
